

TimeSpot®15

Web-capable Time and Attendance Terminal

We focus on customer benefits

- **Helpdesk: open 24/7, all year round.**
- **SLA and extended warranty: Free update of software and repairs.**
- **Customization: TimeTerminal has its own R&D and manufacturing.**

A small wonder

– An industrial PC with web functionality and a long life

Support for 3D acceleration, OpenGL, with animated menus. The design is based on our T&A experience since 1980. TimeSpot®15 with its industry standard for longer life is more than just a PC for office use.

Touch screen registration

More than 150,000 users register their attendance one to four times per day. The screen uses the market's leading TFT technology. Unlimited number of T&A functions can be displayed, including a numeric keypad. The terminal images can be tailored to your request. Automatic brightness adjustment is a key feature.

Communication

Via WiFi, 3G modem or LAN. Power over Ethernet (PoE) can be used for convenience. The terminal functions 100% offline if network signals are lost.

ID via RFID

The most convenient and quick option for employees

TimeSpot® e-Learning

e-Learning is TimeTerminal's in-house developed, tailor-made training program, with interactive guidance and voice functionality. This tremendously saves training time, effort and cost for employees and the company itself. This program can be custom-made to specifications bearing T&A system company's logo, upon entering sales specific pricing and agreements.

TimeTerminal's focus

Extensive qualitative research proves that employees appreciate the touch technology, attractive design and terminal functionality during network failures. More than €2.2 m has been spent on R&D and written-off.
